

How to Install

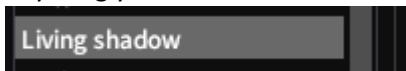

This is only for Living Shadow replacement, If you don't care about Living shadow just go ahead and install the "Frost Knight - DRK Vfx mod" normally and you are done.

If you want to install Living Shadow you need to follow below steps :-

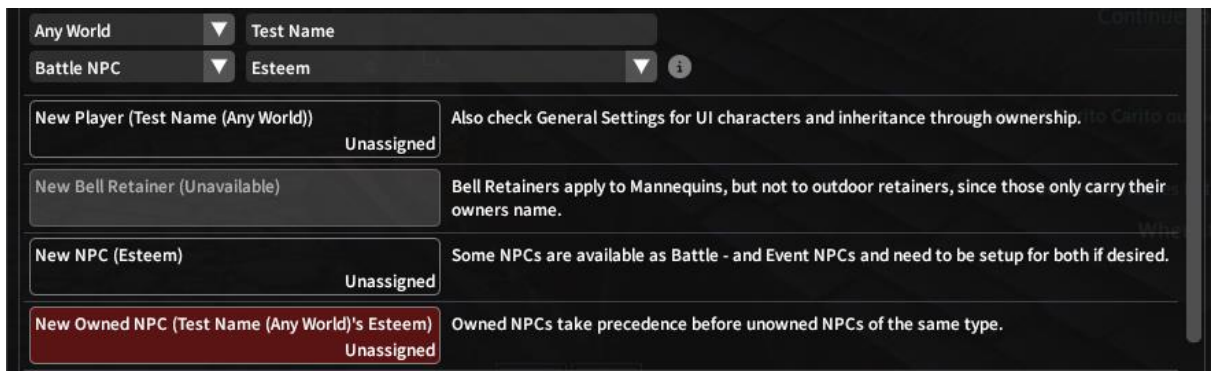

Living Shadow is only possible due to **Penumbra**. It will break the game if you try with texttools, install it only with "**Penumbra**"

Steps for Setup :-

1. You need to create a new collection in your Penumbra for Living Shadow specifically. Name it anything you want

2. Assign this collection to "Esteem" in "Battle NPC" in "New Owned NPC" as shown below, it is under "Individua Assignments". You need to add your character name so it doesn't affect other's "esteem"

3. Inside "Living Shadow" Collection install the two full scale or half scale modpacks.
4. Install the main modpack "Frost Knight - DRK Vfx mod" in your normal collection and **DONE**.

Warning:- Follow the steps carefully or you might break the game...

NOTE:- You need the main modpack enabled for Living shadow to work...So make sure the two living shadow modpacks and the main modpack all 3 are enabled

The Half scale model and skills pack conflict with each other, assign higher priority to the skills one....
